

Clariane Innovation Days in Italy: Neuromodulation in the service of rehabilitation

On the occasion of the third edition of Clariane's Innovation Days, held on 25–26 September 2025 in Brebbia, Italy, the Group brought together researchers, caregivers, entrepreneurs and European partners to collectively shape the future of rehabilitation, with a particular focus on neuro-rehabilitation.

Entitled “Brain neuromodulation and neuro-rehabilitation: from science to practice” and organized in collaboration with the Borghi Foundation and the European Innovation Council, the Clariane Innovation Days 2025 aim to foster innovative solutions around a major challenge: using neuromodulation to advance patient rehabilitation.

For two days immersed at the Gaetano e Piera Borghi Foundation, a leading rehabilitation center, researchers, clinicians and entrepreneurs will showcase the latest scientific advances and share solutions for the rehabilitation of tomorrow.

The program will feature several highlights, including:

- The screening of the film OREKA, retracing the journey of high-level athlete Maxime Cabanne, a paraplegic sportsman, and his rehabilitation supported by the teams at the Inicea Marienia clinic.
- Scientific presentations from researchers based in Bordeaux, Barcelona, Dijon, Milan and Ferrara on neuromodulation applied to language disorders, post-stroke spasticity, neuroplasticity and cognitive rehabilitation.
- Start-up pitches from innovators such as Brain&Care, Corticale, Dessintey, Mirroneurocare, NeuronUp, Sooma, and Wearable Robotics.
- A roundtable on integrating new technologies and assessing their acceptability by caregivers and patients.

Launched in 2024, Clariane's Innovation Days stand at the crossroads of science and innovation, fully illustrating the Group's commitment to improving care practices and the quality of life of people living with frailty. Previous editions focused on neurological and robotic rehabilitation (Biarritz 2024) and innovation in mental health (Barcelona 2024).

“With this new edition of the Innovation Days, Clariane reaffirms its commitment to exploring new scientific and technological avenues to improve care and enhance the quality of life of vulnerable individuals. We are convinced that innovation is a key lever to strengthen both the effectiveness of care and the humanity of support.” said Antoine Piau, Clariane's Group Medical, Ethics and Health Innovation Director.

About Clariane

Clariane is the leading European community of care in times of vulnerability. It has operations in six countries: Belgium, France, Germany, Italy, the Netherlands and Spain

Relying on their diverse expertise, each year, the Group's 63,000 professionals provide services to nearly 900,000 patients and residents in three main areas of activity: care homes (Korian, Seniors Residencias, etc.), healthcare facilities and services (Inicea, Ita, Grupo 5, Lebenswert, etc.), and alternative living solutions (Âges & Vie, etc.).

In June 2023, Clariane became a purpose-driven company and added to its bylaws a new corporate purpose, common to all its activities: "To take care of each person's humanity in times of vulnerability".
