

Koala

The digital companion for staff in facilities.

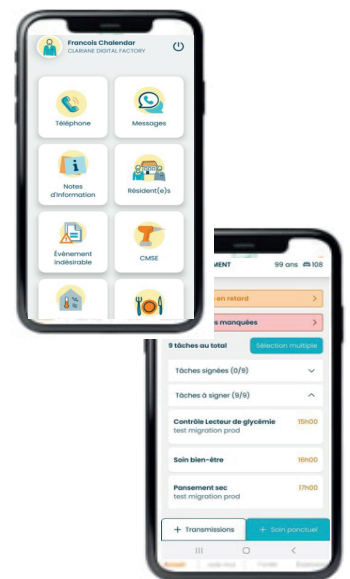

Developed by Clariane with and for our employees, Koala was designed to meet a simple need: to make everyday work easier for professionals in our facilities and enable them to spend more time on care and support.

At the heart of the project is a clear ambition: to save professionals time so they can devote more of it to what matters most: supporting, listening to and caring for the people in their care.

A smartphone “super-app” designed to simplify daily tasks.

- Communication: phone calls, chat messaging, information notes
- Point of care: nurse calls and care documentation with AI voice assistant
- Support services: catering, building maintenance, cleaning, adverse events.

Koala replaces DECT phones, tablets and PCs for field staff with an all-in-one smartphone solution.

Deployment status

- 185 nursing homes deployed in France, with 19 additional sites planned by year-end Deployed in 3 French clinics (full scope in 1 clinic, bio-cleaning traceability in 2 clinics)
- Pilot underway in Germany (bio-cleaning and C-Maintenance)
- Potential international roll-out under evaluation
